

EUREKA[®]

maximizing your bathroom !

The Deureka shower doors offer a perfect synthesis of space and comfort. By focusing on innovation and design, space saving is one of the strongest features of the shower walls.

Furthermore, the shower walls form part of an extraordinary system and offer numerous tailor-made solutions. Easy to maintain and versatile - also for complex bathroom set-ups; this is exactly why these shower walls are ideal for bathrooms of any size and shape.

To comply with any customer wishes, we offer a wide range of finishing options for doors, profiles, hinges and door knobs. This increases our product range and makes it possible to fully adjust these functional shower doors to suit your personal requirements.

Deureka complies with the highest requirements

Deureka represents space saving shower doors that offer optimum cleanliness and reliability. All our models are maintenance friendly, comply with the highest quality requirements and bear the **CE**-label. Our models are subjected to impact resistance, shattering and sustainability tests. The doors comply with the current European product standards.

Looking to the future

We look to the future in everything we do. That is why we always seek pioneering and innovative solutions. We are specialists in providing tailor-made solutions for every bathroom.

Service

Our sales team is at your service during each phase of a project: from vision to solution, from order to delivery. You can also contact us after delivery if you have any questions regarding, for example, installation, maintenance or guarantee. If you wish to see our range personally, please contact our Sales Manager in our showroom in Vichte. There, we can reconstruct your bathroom with our mobile walls.

Your project, our challenge!

Each project, big or small, receives the same attention from our team!

Our method stands for reliability. We will deal with your project with the utmost care. That reliability is expressed in clear and honest arrangements.

One point of contact during each phase of your project!

- Integration of your plans during the design phase in collaboration with your architect
- Measurement on location
- Detailing in 3D
- Quote
- Order
- Follow-up of delivery and installation
- After-sales services

IN SHORT, THE POSSIBILITIES ARE ENDLESS

- The doors are made from sustainable polymethyl methacrylate of 8 mm thick.
- The plastic takes on the temperature of the environment, which means the doors feel comfortable to touch.
- The limited weight provides even more ease of use.
- The doors can be delivered in a clear or matted realisation.
- Floating doors, i.e. no obstacles for the users and no risk of accumulating dirt or bacteria
- Soft closing doors by way of magnet strip at door height.
- The hinges (standard matted chrome) have an adjustable kink position
- Handy (matted chrome) door knobs with safety screw.
- The profiles consist of an upper and lower INOX 304 profile and are adjustable.
- Strong in tailor-made
- Maintenance friendly
- **CE** NBN EN 14428 + A1:2008

GUARANTEES

Choose sustainability, choose Deureka

- 25-year guarantee on discoloration of Plexiglas
- 25-year guarantee on maintaining transparency of Plexiglas
- 4-year guarantee on hinges, door knobs and profiles
- We offer a 10-year after-sales guarantee on all wear-and-tear parts

CLASSIC

STANDARD

Classic tailor-made solution for every space

By using sustainable materials for the door and the fixtures, we offer an optimum solution for any space!

The door panels have a U-profile stainless steel finish across the full width and height of the door, creating a modern look in every bathroom.

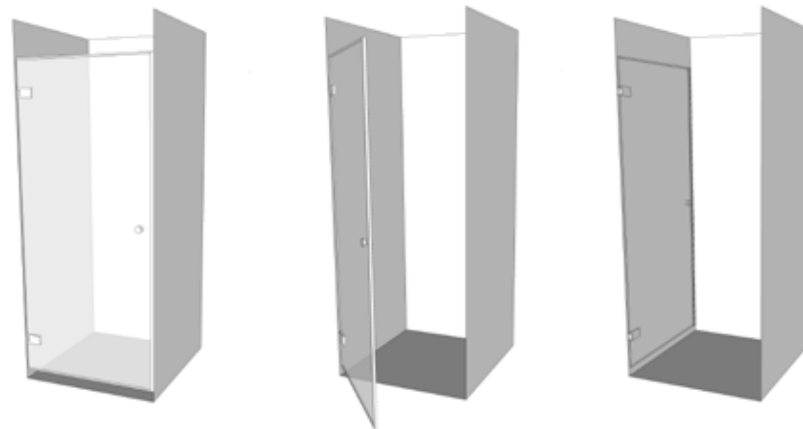

CLASSIC

LITE

Basic and sound

An easy set-up offering you many years of easy use, that is what Classic Lite offers.

The doors are fixed to the wall with the hinges.

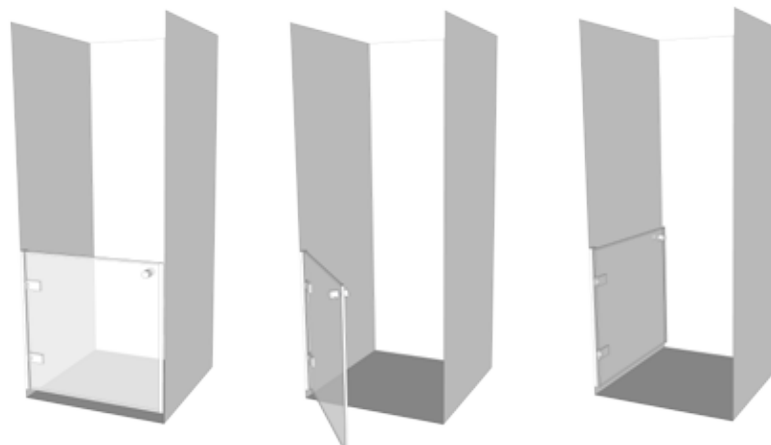

CLASSIC

DEUX-QUART

Offering help within a small space

If you need help and have a shower situated between two walls, then our Classic Deux-Quart model offers the solution you need! The limited height provides sufficient comfort to both the person receiving care and the person providing care during showering.

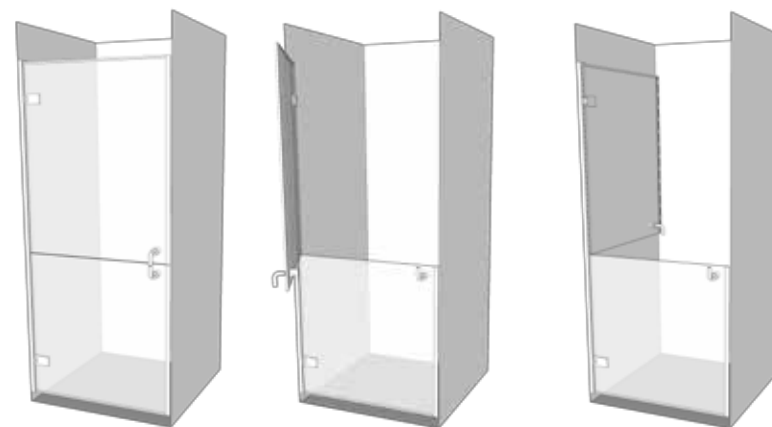

QUATRE-QUART

A solution for everyone

The Quatre-Quart model was designed with a view of a mixed public. The shower door offers the user the option to use the shower unaided, as well as with assistance!

Each panel can be individually opened or closed!
By using our innovative door handle, the top and bottom panel can be linked. Just one simple movement and you will be able to disconnect the panels and move them separately!

ROUND-IT

STANDARD

Maximum functionality

The space-saving Round-it model offers the perfect solution in small bathrooms. Due to the large curve we do not lose any space in the bathroom and the space within the shower remains comfortable. Both door panels can turn both inwards and outwards, creating a very user-friendly situation.

The panels are made of 8-mm thick plastic, making them very light to use.

Thanks to the floating fixtures there are no obstacles for the user, excluding the risk of bacteria forming between the door and the floor.

Safety first

The safety of the user is paramount at Deureka. The curved shape means that the risk of injuries is kept at a minimum.

ROUND-IT

LITE

Minimalistic look

The Lite version offers the essence of a sound shower door! The hinges are fixed directly on the wall, retaining a sleek look in the bathroom.

Simplicity without losing sustainability is key in this model! In doing so, we maintain the space-conserving aspect, proving the added value of this model!

A lite and compact door knob is used in the Lite version.

A single hinge is connected on 3 points.

The hinges are fully finished and easy to maintain.

ROUND-IT

TWIN

Tailor-made in the essence

If you require more flexibility and walk-in space, then the integration of this model provides the perfect solution.

This model can be applied when the shower cubicle is directly situated next to a hallway or obstacle.

ROUND-IT

DEUX-QUART

Providing comfortable help as well as the desired privacy

Thanks to the limited height (85 cm) help can be provided during showering.
Water is stopped, which means that the carer can comfortably provide help without becoming wet.

Light in use

All shower doors are made from 8 mm thick polymethyl methacrylate. This means that they are extremely light and can be closed or opened with one simple movement.

ROUND-IT

QUATRE-QUART

The perfect balance between independence and assistance

If you don't need help showering or if you only need assistance once in a while; Quatre-Quart is the model that accommodates both! The panels can be independently opened or closed, depending on your requirements. Each side can also be used as a whole panel, thanks to our innovative door handle!

Combine to your heart's content

You can combine different panels within one model.

You select a left and right side from the product range. Each combination is tailor-made depending on the space available in the shower cubicle.

The type of hinge and the profile are determined, depending on the possibilities and requirements.

SOLUTION

- STANDARD

- QUATRE-QUART

Guaranteed space and walk-in comfort in your bathroom thanks to a timeless and sleek design.

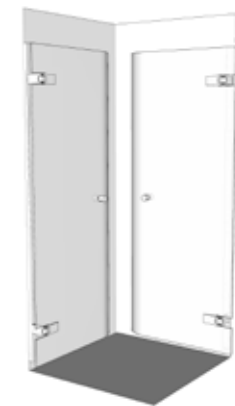

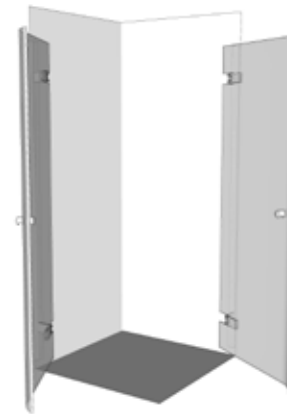

SOLUTION

STANDARD

The feeling of space prevails

The slight arch provides more space within the shower cubicle.

The high-quality 180° pivoting hinges provide even more ease of use in comparison to the classic systems. All the taps, shower rods, wall brackets and any shower seats are hidden behind the doors!

SOLUTION

LITE

Minimalistic look

The Lite version offers the essence of a sound shower door!
The hinges are fixed directly on the wall.
Simplicity without losing sustainability is key in this version!

In doing so, we maintain the space-conserving aspect, proving the added value of this model!

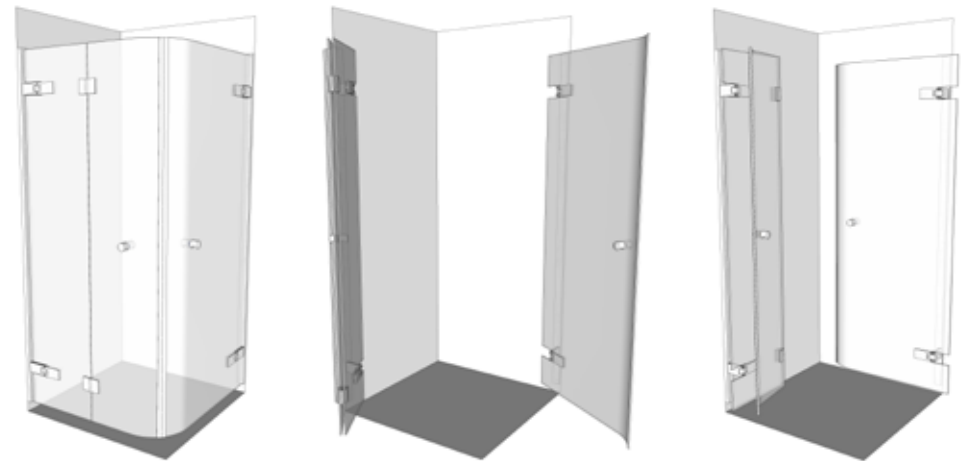

SOLUTION

TWIN

Additional space for tailor-made work

If you require more flexibility and walk-in space, then the integration of this model provides the perfect solution.

This model offering maximum inside space can be applied when the shower cubicle is directly situated next to a hallway or obstacle

SOLUTION

DEUX-QUART

Additional space and providing help comfortably

The added space provides more comfort in the shower cubicle. The user enjoys sufficient privacy without obstructing the care provider.

The care provider can help easily without becoming wet.

After showering, the care provider just places the doors inwards, making the full bathroom space available to provide assistance!

SOLUTION

QUATRE-QUART

Maximum space with maximum ease of use

The Quatre-Quart model allows you to shower unaided, as well as with assistance! Each panel can individually be opened or closed!

By using our innovative door handle, the top and bottom panel can be linked. Just one simple movement and you will be able to disconnect the panels and move them separately

TECHNICAL SPECIFICATIONS

WALL FIXTURES

The following fixtures are available in our product range.

Standard:

The standard profiles consist of an adjustable bottom and top profile, made from brushed stainless steel 304. These profiles are 6mm adjustable. The fasteners are recessed, which means maintenance can be done quickly and efficiently.

Lite:

The hinges can also be fixed directly on the wall. These fixtures are used in the various Lite models.

Lift profile:

A third option is a profile that is at door-height and has an integrated lift element. This profile is also adjustable from the wall.

EMERGENCY CALL BUTTON

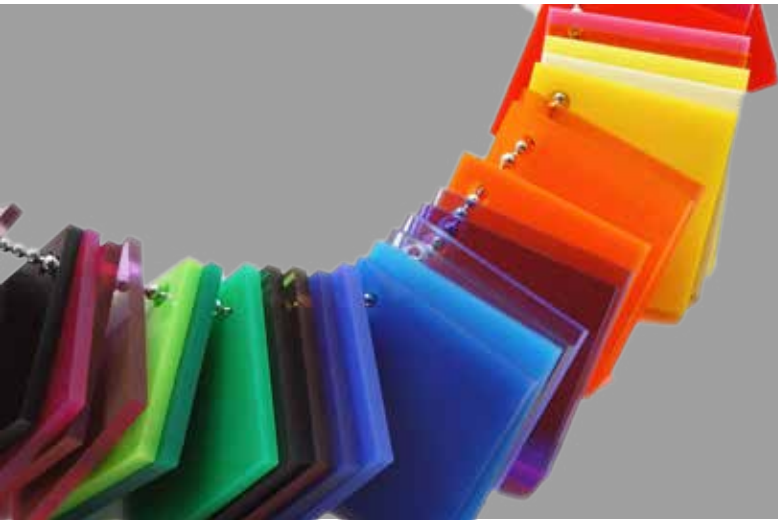

The standard profile can also be equipped with an emergency call button with LED lighting.

This button offers a fully integrated alternative without visible cables. The LED button changes colour if a call is made, putting you at ease.

The call button is compatible with the current call systems used in hospitals and care centres.

VERSIONS

Our shower doors are made from high-quality polymethyl methacrylate of 8mm thick. Robustness, heat resistant, light and durable; these are just some of the qualities of this product.

The door is normally produced in the FROST version. However, you can also opt for a glossy version or a colour; these options are available at an additional fee. You can also personalize the doors with a logo or drawing of your choice.

MAINTENANCE REQUIREMENTS

It is extremely important to maintain your shower on a daily basis. You can clean the bathroom with kitchen grade vinegar, diluted with water, but in order to ensure that you will enjoy a clean shower for years to come, we advise using the Blitz Sanitary Spray to clean the surface.

This shower cleaner and the microfibre cloth were specially designed to clean our shower doors reliably and thoroughly; both are available in our shop.

PLEASE NOTE:

NEVER use abrasive, alkaline, aggressive or caustic maintenance products!

These products are not only harmful to the environment, but also cause (invisible) damage to the doors, the stainless steel accessories and taps.
